ABOUT ME

I am a recent Computer Science graduate looking to use my skills gained from University in a professional environment. I strive in challenging environments and enjoy learning and testing myself. I respond well to positive criticism and try my best to have an important and helpful role in the workplace. I am aiming to be a great Web Developer who is a key member in a team.

PROJECTS

Contact Keeper

- Description – A full stack React web-application using React hooks, Reacts Context API using a MongoDB API to store users and their contacts. This is a basic website which allows a user to login, register, add, remove and update contacts into a list of contacts, much like a Phonebook.
- Focus – Implementation of React hooks and incorporation with the Context API to minimise prop drilling. Using MongoDB to create an API.
- Learnings: React Hooks, React Context API, MongoDB, Bootstrap

New Zealand Police photo tagging

- Description – Worked with New Zealand Police to create a web application which allows police officers to upload and tag images of criminals and crime scenes.
- Focus – Collaborating with a team using SCRUM and Agile techniques to roll out a production ready application within a given time-frame.
- Learnings: ReactJS, Node, SQL, SCRUM, Agile
